REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-2 and 18-20 are allowed as amended over the arguments by the applicants and the prior art of record that neither teaches nor fairly suggestive of a capping product comprising composite particles, particularly containing a sealant layer comprising a binder and a sulfide or elemental sulfur or a sealant layer comprising a binder and a sulfur in a form to effective to sequester metals or a sealant layer comprising clay, gypsum and sulfur. The limitation of "sulfur in the form that is effective to sequester metals" is supported by the specification (Page-3), and the newly added claims were fully examined to establish their patentability. The closest prior art by Marine Board, 1997, Pages 97-99 teaches converting the sediments to solid block by solidification causing in situ immobilization of the sludge followed by treating the industrial wastes by adding elemental sulfur or metal sulfides. The prior art of record neither teaches nor fairly suggestive of applicant's composite particles with the critical sealant layer composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
